

## National regulations, Estonia

The Estonian Ministry of Rural Affairs will fund TOPICS 3 and 4.

Funding is provided by the Estonian Ministry of Rural Affairs (MEM) by the funding programme “Applied Research and Development in Agriculture 2015-2021” (<http://www.agri.ee/et/pollumajanduslikud-rakendusuringud-ja-arendustegevus-aastatel-2015-2021>).

Estonian partners who apply for funding should follow the rules of the programme. The total requested funding for all Estonian partners within one consortium should not exceed 109 000 €. Funding quota of Estonian participants can be up to 100 %.

The national assessment of pre-proposals will correspond to the rules provided in the call. For pre-proposals and within the whole proposal phase no additional national application is needed, an electronic transnational application to the central call office is sufficient.

After the evaluation of full proposals, Estonian project partners with full proposals selected for funding will be invited by the Estonian Ministry of Rural Affairs to contract an agreement.

Scientific results of the projects must be made publicly available.

For further information please refer to the national contact point:
